Where today's research is tomorrow's therapy

At the Menopause— a deficiency of two hormones.

These tablets replenish them both.

1 Two hormones control conception.

You remove any possibility of pregnancy. ORTHO-NOVUM 2mg is virtually 100% effective, and is exceptionally well-tolerated.

2 Two hormones control symptoms.

ORTHO-NOVUM 2mg replenishes both hormones — progesterone and estrogen. This complete replacement alleviates symptoms, and avoids the possibility of hormonal imbalance.

3 Two hormones control bleeding.

You eliminate profuse or irregular bleeding. The balanced dosage of progestin and estrogen gives the patient regular cycles, with minimal flow.
